Perfectly adapted body support and comfort with precise levels of specified **anatomic** zoning

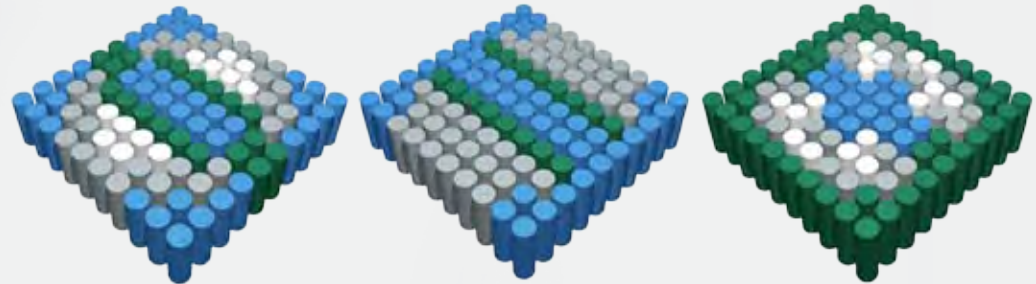

Imagine an innerspring system with four different firmness levels, now imagine you can position those firmness levels anywhere within the unit, creating customised comfort for any body type - bespoke products for specific comfort needs!

Now imagine being able to choose the type of innersprings that system is manufactured from, be it fine quality open coil or luxury pocketed coil.

Well with Leggett & Platt now you can! Presenting the ultimate in precision sleep, Anatomic open coil or pocketed coil comfort systems. Create an infinite number of comfort stories with specified anatomic zoning!

- *The ultimate application of pocketed or open coil innersprings*
- *Versatile and unique sleep design concepts*
- *4 levels of support achievable through specified zoning*
- *4 levels of firmness within a 20% range*
- *Perfectly adapted body support*

Configuration examples:

The Active Support Technology® of innersprings allows your muscles to relax in a more natural sleep position. The coils adjust instantly to your sleep movements, comforting and supporting your body actively.
