**This premium knotted offset innerspring combines fine wire technology with advanced engineering to provide superior comfort and contourability**

**Micro-Coil Head** - Smaller diameter hinged coil head shape allows individualized flex and contouring, providing optimum support for differing body weights and shapes.

**Offset Profiles** - Designed with two flat offset profiles ensure that each coil is securely attached to the helical, and its neighbouring spring.

**Higher Coil Count** - Smaller diameter coil design, increases the spring count and the amount of working wire within the unit, improving comfort and generating a luxurious feeling across the entire surface area.

**Premium Support**- The superb body support qualities of Micro-Offset when combined with luxurious filling materials, provide the ideal premium product combination.

**Heat Tempered Wire** - Coils retain their consistent shape and support qualities for years of satisfaction.
