Contemporary Fusion
a blend of functionality, comfort & style

the essence of comfort...

A photograph of a bedroom. In the foreground, a bed with a white sheet and a pair of glasses on it. In the background, a person is sitting on a blue sofa near a window with light coming through. The overall tone is calm and modern.

What is S-ence™ ?

S-ence™ is a highly innovative “self- posturising” sleep foundation system with unique “active intelligence”, allowing it to continually “detect & react” to changes in your individual sleeping pattern!

What does that mean ?

It means S-ence™ is a foundation system like no other!

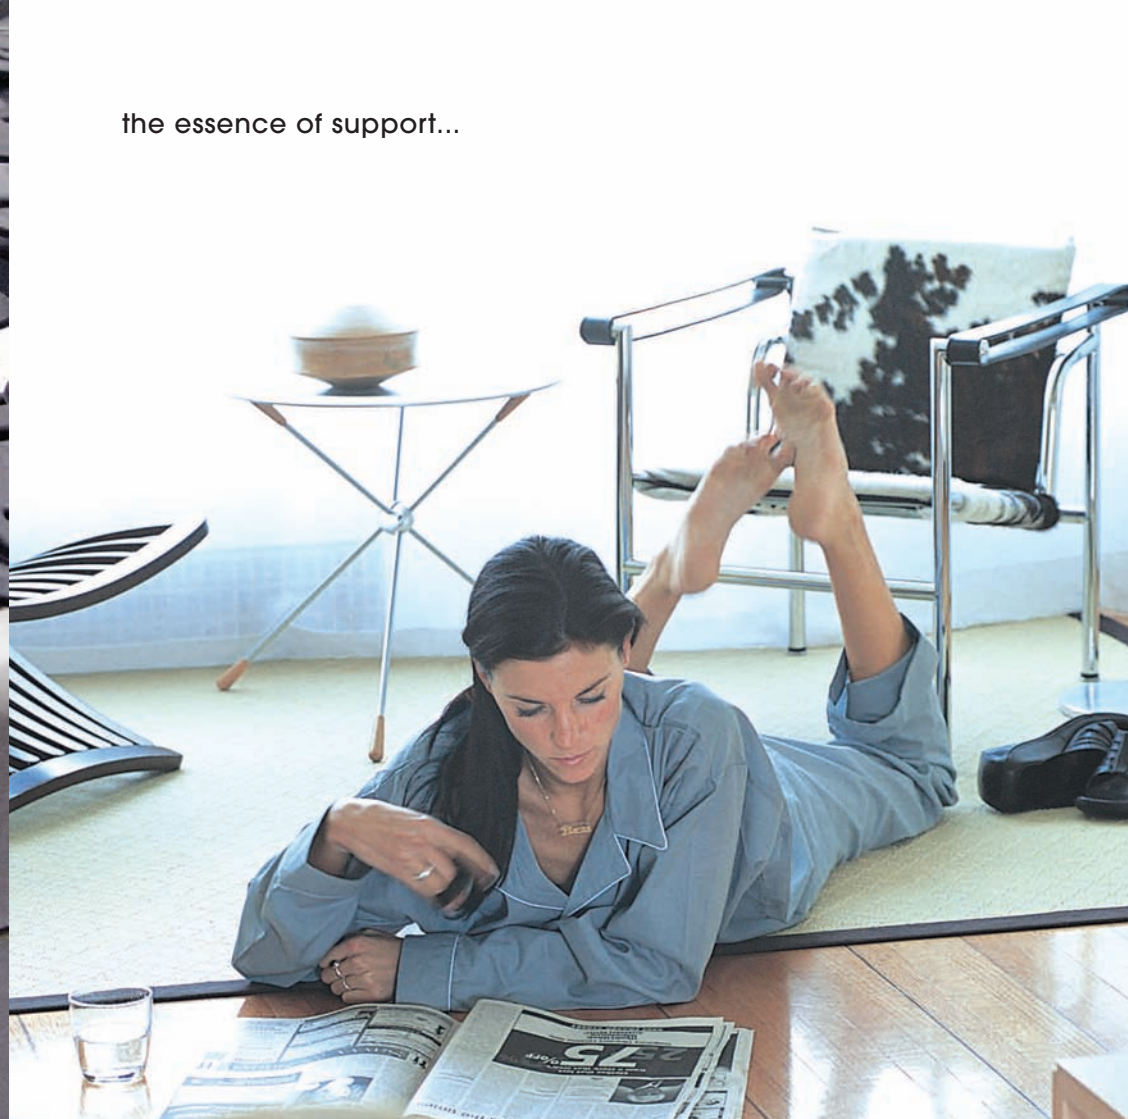

During any normal night's sleep you subconsciously move and reposition yourself many times, this highly advanced, intelligent sleep foundation has been specifically designed and engineered to automatically identify these changes in body weight, shape and positioning and provide gentle yet precise support, whilst continually maintaining your optimum level of comfort.

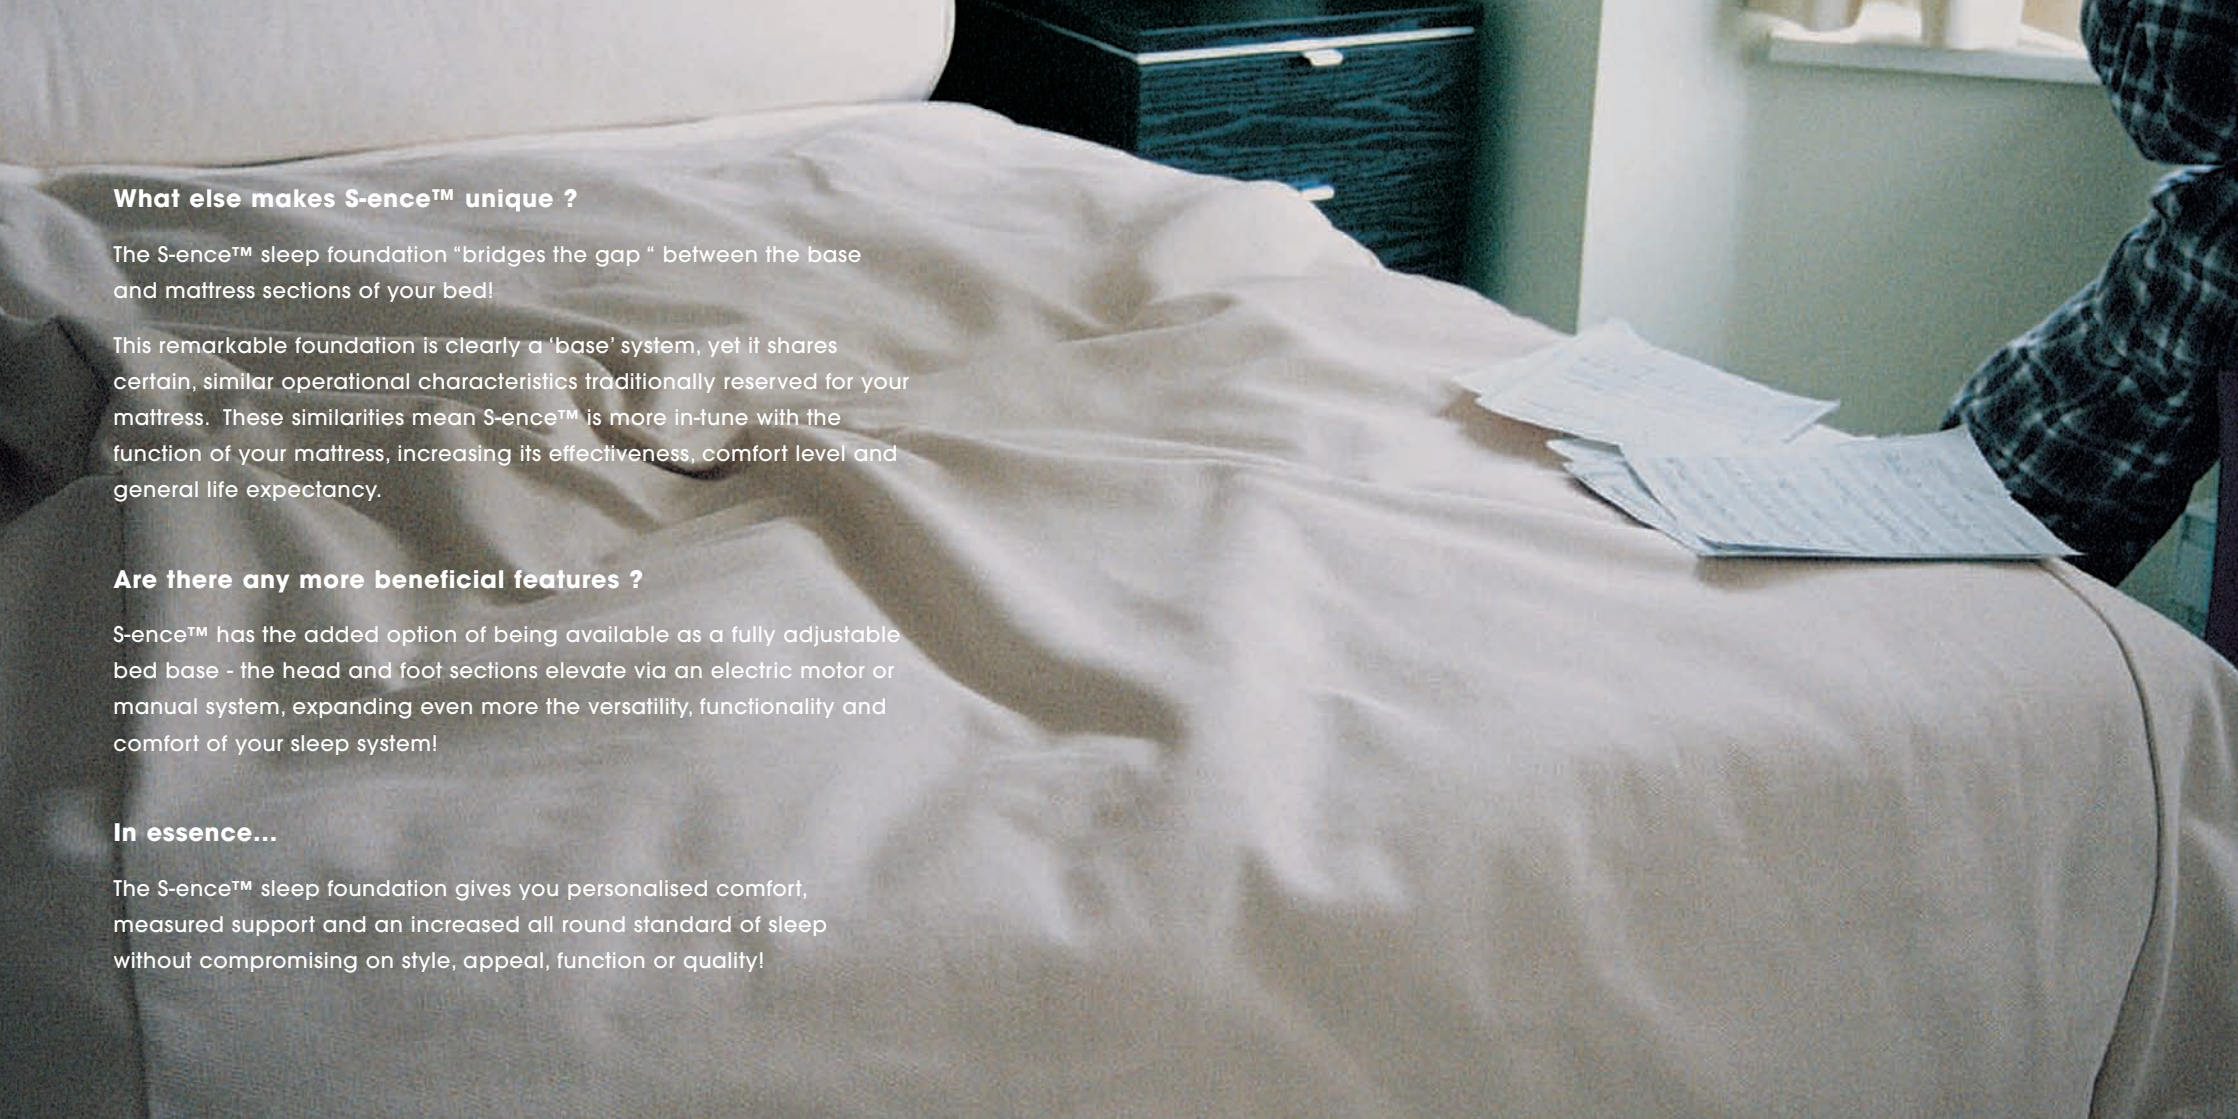

S-ence™ achieves all this without delivering any unwanted and highly intrusive “motion transfer”, movement echoes generated by you or your partner whilst you sleep!

Working in conjunction with the mattress, the subtle movement of this foundation is essential to the overall effectiveness of the system; remember, as you sleep S-ence™ works, intelligently detecting and reacting to every movement you make!

the essence of support...

A photograph of a bed with a white sheet. A stack of papers is lying on the right side of the bed. In the background, there is a dark wooden nightstand and a window with light coming through. A person's arm in a plaid shirt is visible on the right side of the frame.

What else makes S-ence™ unique ?

The S-ence™ sleep foundation “bridges the gap “ between the base and mattress sections of your bed!

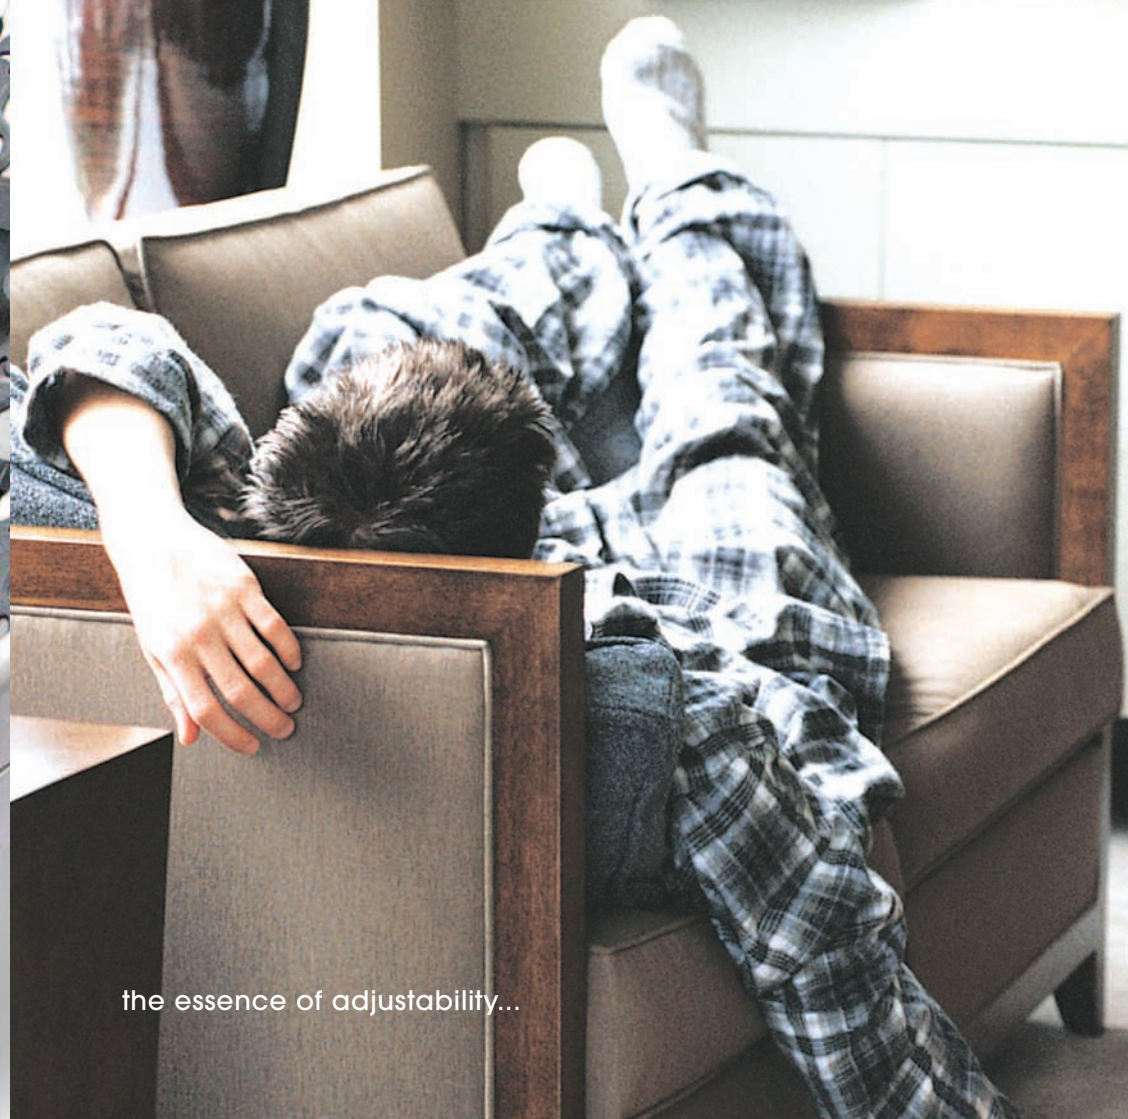

This remarkable foundation is clearly a 'base' system, yet it shares certain, similar operational characteristics traditionally reserved for your mattress. These similarities mean S-ence™ is more in-tune with the function of your mattress, increasing its effectiveness, comfort level and general life expectancy.

Are there any more beneficial features ?

S-ence™ has the added option of being available as a fully adjustable bed base - the head and foot sections elevate via an electric motor or manual system, expanding even more the versatility, functionality and comfort of your sleep system!

In essence...

The S-ence™ sleep foundation gives you personalised comfort, measured support and an increased all round standard of sleep without compromising on style, appeal, function or quality!

the essence of adjustability...
